- (a) This index was first published in August, 1960. It has been compiled for periods from September Quarter, 1948.
- (b) This index does not measure changes in price of all imports.
- (c) The indexes for "Goods Principally Home-Produced" and "All Groups" have been reconstructed as from the base period by excluding potatoes and onions. For June, 1963, indexes comparable with those previously published, including potatoes and onions, were: Goods Principally Home-Produced, 372; All Groups, 342.

(a) Up to and including 1958 *average* rainfall for each year (represented by 100) is the average over the period 1911–1942. As from 1st January, 1959 a long period average from a selection of representative stations is used.

SEASONAL CONDITIONS, TASMANIA: JUNE, 1963

Rainfall: The sequence of dry months, which commenced in November, 1962, continued into June, 1963 when rainfall readings below normal were experienced everywhere except on King Island and the north of Flinders Island.

The relatively dry West Coast, Central Plateau and Northern Midlands were most deficient, and between Launceston–Campbell Town–Avoca only 20–30 percent of normal rainfall was recorded. The major area of the State reported only 40–60 percent of normal rainfall.

Temperature: Day temperatures for the whole month were close to normal. On the West Coast the Southwest and parts of the East, mean maximum temperatures were a little above average, but elsewhere day temperatures were below normal.

Mean minimum readings were two to three degrees below normal over areas extending from the East Coast (Swansea) across the Midlands, North Central Plateau and inland West Coast. The Northern Coast was milder with mean minima readings slightly above average.

Frosts, Snow, Fogs, &c.: Frosts were general, and surprisingly severe in Eastern districts. The heaviest snowfalls occurred from 16th to 19th with seven inches at Mt. Arrowsmith, three inches at Ben Lomond and four inches at Derwent Bridge.

Fogs occurred in the Central North during periods 11th to 13th and 26th to 29th causing interruptions to air services and motor vehicle traffic.

Crops and Pastures: Some crops were affected by the dry conditions although in the North West conditions were fair after mid-month rains and milder temperatures. There were some failures of forage and cereal crops.

Pastures showed no growth, which could be quite serious during the Spring. Because of the absence of regular winter rains, pastures will also be more susceptible to dry periods later in the year.

Stock showed no signs of deterioration, despite the shortage of feed. There were no significant lamb losses during the month.
